

# HUMAN MOBILITY AND POVERTY REDUCTION - A SNAPSHOT

## Migration is a powerful poverty reduction tool

Human mobility benefits both **ORIGIN AND DESTINATION** communities

After **moving to a developed country**, migrants from the poorest countries, on average, experienced:

**Remittances are a key finance source** for developing countries

Totalling **USD 647 BILLION** in 2022, significantly exceeding official development assistance and aiding poverty reduction

In **CHILE**, between 2009 and 2017, the country's GDP increased by **\$63.3 BILLION**

**Migrants** - while accounting for just 3.5% of the workforce - contributed to more than **11% of economic growth**

Yet, migrants are more likely than non-migrants **to be in poverty**

Around **35%** of international migrants were in or at risk of poverty. Compared to just **23%** of non-migrants

Due to different restrictions, many migrants **have no access to social protection**

Labour migrants are not covered

Cannot transfer their benefits home or to another country
