PARTNERSHIPS ARE CRUCIAL TO ADDRESS THE CHALLENGES AND OPPORTUNITIES OF MIGRATION

Multi-level partnerships advance and operationalize policy coherence in practice to leverage migration for sustainable development.

65% of SDG targets are linked to local government activity.

Direct communities and cities involvement foster real-time development solutions.

Despite this, MOBILE POPULATION GROUPS ARE OFTEN EXCLUDED from official statistics and therefore from development policies.

The call for improved migration data is referenced in SDG 17.

Accurate and disaggregated data can support better programming and policies.

Protect and empower people impacted by human mobility.

Help to reduce vulnerabilities.

In 2022, the global SDG database disaggregated ONLY ONE INDICATOR by migratory status.

On average, only 55% of countries report on SDG migration indicators.
